

FOR IMMEDIATE RELEASE, WEDNESDAY, January 23, 2008

PRINCE GEORGE, BC - WATER LINE BREAK IN BEAR LAKE, BC

The Bear Lake Water Main was damaged earlier this morning due to construction activity. The damage has resulted in a broken water main and crews have been dispatched to repair the break. The current assessment indicates that the main should be repaired by late this afternoon.

The water system has been shut down until further notice and Bear Lake residents and businesses connected to the water system are requested to curtail their water use to prevent complete drainage of the system.

Further updates on progress of the repair and reactivation of the system will be provided throughout the day.

We apologize for this inconvenience and thank the residents and business for their patience as we work to repair the water main.
