Dunster Regional Transfer Station

SITE OPERATION

The Dunster Regional Transfer Station is operated by the Regional District of Fraser-Fort George and is designed to receive small loads of household garbage. Household garbage is comprised of materials such as food waste, packaging waste, plastics, textiles, glass and cold wood ash from residential fireplaces. The material delivered to this facility will be transferred to the Foothills Boulevard Regional Landfill in Prince George.

Commercial and large loads should be delivered to the Valemount Transfer Station or Legrand Select Waste Landfill. Applications for the Legrand Landfill are available at the McBride Transfer Station.

TRANSFER STATION SERVICES

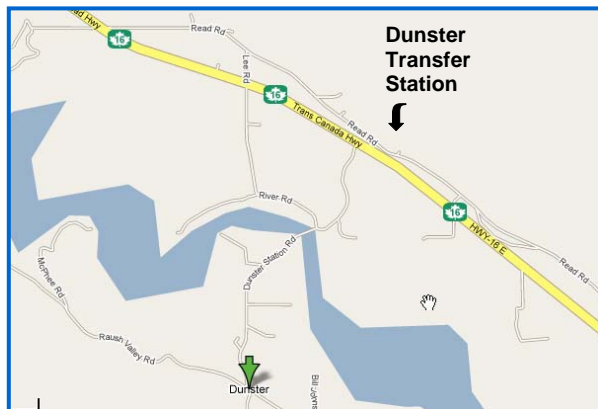

This facility provides household garbage disposal service by way of the on-site transfer station. All waste is to be deposited into the transfer station bins.

The transfer station is designed to receive bagged household garbage and to accommodate the tipping of garbage cans. Garbage should be contained within a large garbage bag or a garbage can with a lid for transport to the facility. Ensure that the bin door is shut and latched to prevent animals from entering the bin.

HOURS OF OPERATION

The transfer station is open from dawn to dusk, 365 days a year.

Location Map

The following waste disposal options and services are available at the McBride Transfer Station and Valemount Regional Transfer Station.

MULTI-MATERIAL RECYCLING

Recycling bins are provided to receive:

- **Metal Food Containers and Milk Jugs**
rinse cans, remove labels, place lids inside cans and flatten.
- **Mixed Paper**
cardboard, catalogues, glossy flyers, cereal boxes, office paper, kraft grocery bags, phone books, envelopes, magazines, newspaper, cardboard egg cartons (no paper with plastic, foil, wax, or food residue please).
- **Cardboard Compactor**
remove all non-cardboard material such as plastic and styrofoam - staples and tape can remain on boxes.

ALTERNATE WASTE DISPOSAL OPTIONS

Scrap Metal Recycling

Private scrap metal services are available for commercial generators and for auto hulk disposal. Small loads of metal materials are accepted at the Valemount Regional Transfer Station at no charge.

- Appliances and parts such as stoves, dishwashers, hot water tanks, washers, dryers and any other **non-refrigeration** type appliance;
- Bicycle frames and barbecue hulks;
- Metal roofing and siding;
- Lawn mower bodies, snowmobile and motor bike frames (fuel and lubricants must be removed); and
- Any steel containers (drums and tanks) must be crushed or perforated to ensure that they contain no liquid or hazardous material. Pressurized containers cannot be recycled.

Refrigeration Appliances

Refrigeration type appliances are accepted at the Foothills Landfill site for a nominal disposal fee of \$15. The fee pays for the recovery and recycling of the ozone depleting refrigerant gases and the recycling of the appliance body. Ozone depleting gas recovery is mandatory and regulated by the Province of BC for the protection of the earth's ozone layer.

Tire Recycling

When buying new tires, leave your old ones with the tire retailer and they will ensure that they are recycled. Otherwise, tires can be taken to the McBride and Valemount Regional Transfer Stations. Passenger and Light Truck Tires (PLT's <16.5") **off rims** can be disposed of at no charge. There is a disposal fee for medium truck tires (MT's >16.5" and <25.5") and off road tires (ORT's >25.5" and/or with a tread width > 12") **off rims**. Disposal fees are charged at the Valemount facility for MT and ORT tires.

Yard and Garden Waste Recycling

Backyard composting is an effective method for handling your yard and garden waste. Leaves, grass clippings and vegetable clippings can all be recycled in your backyard then added to your lawns and gardens.

The Recycling & Environmental Action Planning Society (REAPS, www.reaps.org) offers workshops and provides information brochures on home composting. For more information, call REAPS at 250-561-7327.

The Valemount Transfer Station site has a centralized composting operation for recycling yard and garden trimmings (leaves, grass and hedge clippings, plants, flowers, weeds, vegetable stocks, shrub and tree branches up to 75 mm (3 inches) in diameter). Land clearing debris or industrial sources of wood waste are not accepted for composting.

When delivering loads of compostable yard and garden waste, please ensure that loads are covered and contained so that material does not blow out onto the roads.
