

**REQUEST FOR PROPOSALS PS 01- 09**

**BEAVERLY FIRE/RESCUE NEW FIRE HALL PROJECT  
DESIGN-BUILD CONTRACTING SERVICES**

**ADDENDUM NO. 5**

1. **Question:** *Is the main service coming in below ground or above?*

**Answer:** Below ground.

2. **Question:** *What size is the back up generator?*

**Answer:** 100 amp

3. **Question:** *What size of transfer switch?*

**Answer:** 100 amp

4. **Question:** *#10 – is there a fire alarm panel or just security?*

**Answer:** There will be a security panel. The smoke detector for the offices and the heat detectors for the bays will be connected to this panel.

5. **Question:** *Are the two computer/phone ports brought to a central Telus Panel?*

**Answer:** Yes, located in the service room.

6. **Question:** *Do you know what wattage of baseboard heaters you want?*

**Answer:** The baseboard wattage and size will be determined by the contractor as required for each size of room.

7. **Question:** *What size of service will you require for the future well?*

**Answer:** A 15 or 20 amp outlet is required.

8. **Question:** *Is the septic system a gravity feed or do we have to plan for a pump system?*

**Answer:** The septic system will be gravity feed into a lagoon system.

9. **Question:** *Can we run any of our service to the 100 amp panel or is this reserved for the extension?*

**Answer:** The only service that can be run to the 100 amp panel are the truck bay area lights and wall outlets.

10. **Question:** *What boiler controls do you require?*

**Answer:** The boiler controls will be determined by the building design's heating requirements.
