

**REQUEST FOR PROPOSALS PS 02- 10
NEW PUMPER FIRE TRUCK FOR
RED ROCK/STONER VOLUNTEER FIRE DEPARTMENT
ADDENDUM NO. 1**

Clarification requested for RFP PS 02-10 New Pumper Fire Truck for Red Rock/Stoner Volunteer Fire Department:

Section: BODY #8 - Lower front right side compartment to provide storage for as many Scott SCBA air bottles as possible. State what can be provided.

Question:

1. *How many SCBA air bottles does the fire department want to carry on the new engine?*
2. *Is it acceptable to propose an alternate storage method for the SCBA air bottles than what has been stipulated in RFP PS 02-10?*

Answer:

1. **It was anticipated that the configuration for SCBA air bottle storage indicated in RFP PS 02-10 would result in 9 to 12 bottles at a minimum being stored in that area. Preference is for storage space being provided for 12 SCBA air bottles at a minimum of on the completed apparatus. Preference is for storage of as many SCBA air bottles as many as possible.**
2. **The Regional District will consider alternatives for SCBA air bottle storage configuration.**
