ADDENDUM No. 1

**Request for Proposal CS-20-06
SUPPLY OF BRIDGING EQUIPMENT**

*The addendum is being issued prior to the closing of the request for proposal (RFP) to provide further information, make changes to, or to clarify the RFP documents and is to be read, interpreted and coordinated with all other parts of the RFP documents. In the case of a conflict with the balance of the documents, this Addendum shall govern. **Proponents shall attach a signed copy of this addendum to their proposal submission, failure to do so may result in a non-compliant proposal.***

This addendum is being provided in clarification to RFP CS-20-06 released April 20, 2020.

QUESTION 1: It seems that the audio bridges will only be connecting to 4-wire E&M connections. Will system require IP connections to the consoles?

ANSWER 1: We are combining analog audio and E&M signaling at a common site. The bridging equipment is to allow either dispatch center to communicate with the field analog radio equipment and each other. It is analog audio as the radio systems from the common dispatch center to each of the dispatch centers do not have enough capacity to use ROIP units. IP connections are not required to the console.

I/We hereby verify that we have considered this addendum in our proposal submission.
