1.0 INTRODUCTION AND BACKGROUND

1.1 Overview

The Regional District of Fraser-Fort George (the “Regional District” or “RDFFG”) is inviting proposals from qualified firms to provide consulting services to develop a Generic Closure Plan for 13 rural landfill sites located within the RDFFG. These rural landfill sites ceased receiving municipal solid waste between 1997 and 2009. Based on the assessment of these closed rural landfill sites a Generic Closure Plan needs to be developed. The Generic Closure Plan is to consider the Landfill Criteria for Municipal Solid Waste under the *Environmental Management Act* of British Columbia. The goal is to meet requirements for existing operational permits of these 13 rural landfill sites to be updated and moved into abandonment.

The successful consultant will have a team of qualified professionals with expertise in rural landfill operations and implementation of closure and post closure care at other rural landfill sites in northern communities. Extensive knowledge of the British Columbia Landfill Criteria and demonstrated application of successful landfill closure projects in rural northern settings are required for this project.

1.2 Background

The RDFFG supported moving towards higher standards for environmental protection and practical landfill closures between 1997 and 2009. From originally 19 municipal solid waste landfill sites, 14 disposal facilities are closed with one having recently received an abandonment permit. The remaining 13 closed rural landfill sites have to be assessed for final cover and post closure monitoring needs. These rural landfills are generally of a small volume, and due to the previous practice of burning of refuse, landfill gas is not considered a problem. Although final cover has not been put over any of the rural disposal sites, most of the sites are in reasonable condition. None of the closed rural sites have received topsoil, but all sites have good vegetation and are barely visible from surroundings.

Rural landfill sites closed before 2000: Aleza Lake, Berman Lake, Chief Lake, Hixon, Shelley, Summit Lake, Willow River

Rural landfill sites closed after 2000: Bear Lake, Dome Creek, Lower Mud River, McLeod Lake, Sinclair Mills, Stoner

The following documents have been identified as relevant to this project:

1. 2015 Regional Solid Waste Management Plan (RDFFG, 2016)

2. Annual site inspection reports for closed rural landfill sites.
3. Ministry of Environment assessments for closed rural landfill sites.

2.0 INVITATION AND INSTRUCTIONS

The final Assessment Report will form the basis for developing a Generic Closure Plan.

The Generic Closure Plan for these small rural landfill sites will be in general accordance with the Landfill Criteria for Municipal Solid Waste in British Columbia and in consideration with existing operational certificates for each of these facilities.

This project will require extensive review of historical documentation and correspondence in addition to field work.

9.0 **SCOPE OF WORK**

The goal of the project is to retain an experienced engineering consulting firm to conduct an assessment of the closed rural landfill sites within the seven electoral areas of the RDFFG. The final Assessment Report

will form the basis for developing a Generic Closure Plan. The Generic Closure Plan for these small rural landfill sites will be in general accordance with the Landfill Criteria for Municipal Solid Waste in British Columbia and in consideration with existing operational certificates for each of these facilities. The scope of work will be carried out during the duration of this Contract.

The successful consultant is responsible for developing a project timeline, methodology outlining specific steps required to meet the overall objectives of this project, and adhering to the following Scope of Work requirements:

Assessment Report

- a) Review available background information and information pertinent to site conditions that would assist in developing an all-encompassing assessment status report
- b) Perform necessary field work and site investigations for all 13 rural landfill sites to fill any informational gaps and provide the required analysis and reporting
- c) Perform a site characterization including a review of geology, hydrogeology, site boundary, landfill footprint, topographic contours, rights of ways and other easements, existing structures, tree line and climate for rural sites missing any of this information
- d) Provide a DRAFT and FINAL Assessment Report specifying each rural landfill site, outlining the site specifics, site conditions, status of closure materials applied, assessment with respect to individual operational certificates
- e) Presentation of the Consultant's Assessment Report to the Regional District Board summarizing the findings and providing a reasonable closure approach for each facility including timelines and cost estimates

The Assessment Report is intended to be used by the RDFFG as an overview to assess potential current and future liabilities and address the Ministry of Environment's requirement to update and abandon these closed rural landfill sites by providing closure plan reports.

Generic Closure Plan

- a) Develop a DRAFT and FINAL closure plan that meets or exceeds the requirements set forth by the Ministry of Environment and the Operational Certificates for the rural landfill sites
- b) The closure plan should be generic in nature and can be easily modified to address requirements for individual closure plan submittal for approval to the Ministry of Environment
- c) Provide a more efficient alternative to the proposed approach of developing a Generic Closure Plan

These rural landfill sites are old and small and partially closed and have seen their adverse environmental effects reduced to the passage of time. This should be considered in recommendations for closure and post closure measures to be put forward in the updated permits. The Generic Closure Plan should provide recommendations for end-use of each rural landfill site after closure.
