

Mandatory Site Meeting Notes

**Invitation to Tender ES-21-14
Solid Waste Hauling Services – Mackenzie Regional Transfer Station**

Wednesday, October 20, 2021 11:30 a.m. at the Mackenzie Regional Transfer Station

Staff Present: Jason Dodd, ES Field Supervisor
Anson Hardjojo, ES Solid Waste and Waste Diversion Coordinator

Meeting started at 11:30a.m.

- Tenderers completed sign in sheet
- Discussed the layout of the transfer station from tender
- Entered the bay of the transfer station and provided measurements of the inside of the bay
- Entered and showed the transfer station layout on-site, including public traffic flow and hauling route

Question: Will the hauling be with just end dump or something else?

Answer: The Regional District is looking for only an end dump trailer.

Question: Is the volume strictly only 70 cubic meters?

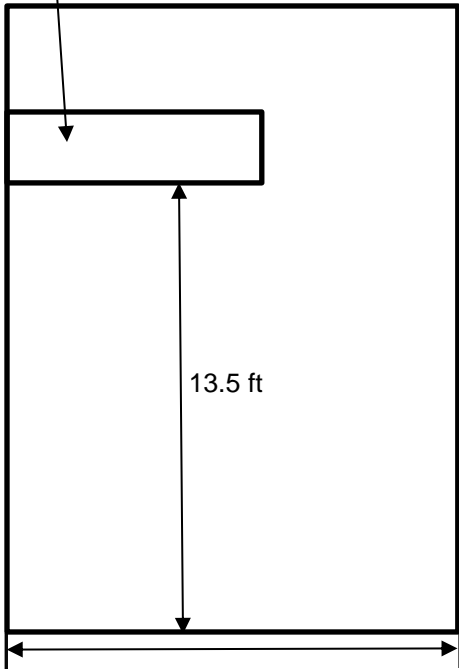

Answer: The Regional District requires the volume to be at least 70 cubic meters. It can be more so long as the vehicle and the trailer are able to enter and leave the site and transfer station bay safely without damaging any of the Regional District's property.

Question: What are the dimensions of the bay?

Answer: Please find the drawings of the bay doors and bay size on the next page.

Meeting Adjourned 11:50 a.m.

Concrete Slab

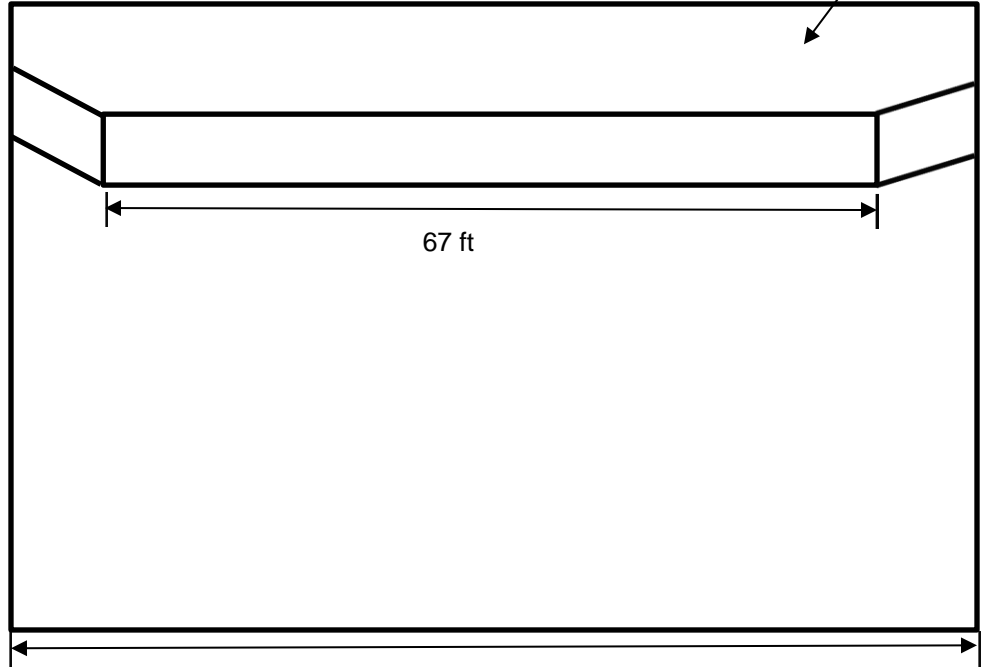

12 ft

Front and Back of
Bay Doors

13.5 ft

16 ft

Top of Concrete Slab
